Proposal of: **Online Clothing Store**

Professor: **Mahdi Molaei**

1. Team Name & Members
    - **Mahdi Babaei**
    - **Hosein Sendani**

2. Project Vision

This project aims to develop a full-stack online clothing store using Jango, PostgreSQL, and React-based components. The system allows customers to browse products, manage their shopping carts, place orders, and access their accounts. It also provides an administrative interface for managing products, inventory, orders, and customers.

The project will follow a structured software development lifecycle, including requirements analysis, system design, implementation, testing, and deployment.

3. Target Audience

- Customers who want to browse and buy clothing online.
- Manager who manages products, inventory, blogs, clients, and customer orders. Also analysis the site profit.

4. Core Features — User Stories

1. As a customer, I want to create an account so that I can access personalized features such as order and manage them in dashboard.

2. As a customer, I want to log in so that I can securely access my personal account and saved data.

3. As a customer, I want to view all available products so that I can explore the entire store collection.

4. As a customer, I want to view product details so that I can make an informed purchasing decision.

5. As a customer, I want to search for products so that I can quickly find specific items I am looking for.

6. As a customer, I want to filter products by category so that I can browse relevant items easily.

7. As a customer, I want to filter products by stock status so that I can only view items that are currently available for purchase.
8. As a customer, I want to select a clothing size so that I can choose the correct fit before buying.
9. As a customer, I want to select a clothing color so that I can buy the product in my preferred style.

10. As a customer, I want to filter products by price so that I can find products within my budget.

11. As a customer, I want to sort products from newest to oldest so that I can see the latest arrivals first.

12. As a customer, I want to add products to my shopping cart so that I can save them for checkout later.

13. As a customer, I want to remove products from my cart so that I can manage my purchase list before buying.

14. As a customer, I want to update product quantities in my cart and product page so that I can buy the exact amount I need.

15. As a customer, I want to see the total price of my cart so that I can know the overall cost before proceeding.

16. As a customer, I want to see discounts applied in the cart so that I can know how much money I am saving.

17. As a customer, I want to see the item count in my cart so that I can keep track of how many items I have selected.

18. As a customer, I want to see an order summary in the cart and checkout so that I can review all costs and items before final payment.

19. As a customer, I want to enter my shipping address at checkout so that my order can be delivered to the correct location.

20. As a customer, I want to enter my name at checkout so that the package is properly identified for delivery.

21. As a customer, I want to select a payment method at checkout so that I can complete the transaction using my preferred option.

22. As a customer, I want to select a shipping method at checkout so that I can choose my preferred delivery speed and cost.

23. As a customer, I want to view my account dashboard so that I can get an overview of my activities and settings.

24. As a customer, I want to edit my personal information in my account page so that my profile stays up to date.

25. As a customer, I want to view my order history in my account page so that I can track past purchases and reorder items.

26. As a customer, I want to view my Wishlist in my account page so that I can quickly access items I saved for later.

27. As a customer, I want to view my wallet balance in my account page so that I can monitor my available store credit.

28. As a customer, I want to manage my saved addresses in my account page so that I can easily select them during future checkouts.

29. As an administrator, I want to view the dashboard overview page so that I can monitor recent products, latest sales, new user/order numbers, total sales, and active online users in real-time.

30. As an administrator, I want to add, edit, and delete products so that I can keep the store catalog updated.

31. As an administrator, I want to search and filter products by category, price, and stock status so that I can easily find and manage catalog items.

32. As an administrator, I want to manage customer orders so that I can process, fulfill, and update order statuses smoothly.

33. As an administrator, I want to analyze orders so that I can identify buying trends and operational performance.

34. As an administrator, I want to manage product stock levels so that I can prevent overselling and reorder out-of-stock items promptly.

35. As an administrator, I want to manage user accounts so that I can handle customer permissions, issues, and inquiries.

36. As an administrator, I want to manage store blogs so that I can oversee content creation and article structure.

37. As an administrator, I want to add, edit, and delete blog posts so that I can keep marketing content and news updated.

38. As an administrator, I want to view analytics so that I can track store profitability and overall performance metrics.
39. As an administrator, I want to manage the homepage layout via CMS so that I can feature new promotions and highlight popular products.

40. As an administrator, I want to view and configure store settings so that I can customize platform behaviors and policies.
